idee per l' arte

It has become more evident during the last few years the need to expand the borders of rhythmic gymnastics through a series of international events open to gymnasts of team clubs. In light of this new mode of expansion we believe it is paramount to appeal to younger gymnasts. Therefore we plan to create a model of competition that might appeal to the audience.

Our idea is an international meeting for clubs to be held possibly every year specifically reserved for gymnasts of the junior category and younger.

In order to pursue this objective we formed a partnership with two key players in the Italian sport industry, and specifically in gymnastics: Venturelli s.r.l. and A.S. Euroginnica

Wilma S.r.l.

"My personal experience and that of my company, born in 1972, in the field of sport shoes and sport apparatuses for gymnastics made us start a new adventure. In 2007 we began production of high quality apparatuses for rhythmic gymnastics. In the past years we worked together on many events with gymnastics federations of many different countries, and our partnership with European clubs is growing stronger.

In light of these two facts I thought it was the right moment to channel all our energies toward contributing to sponsoring an event in Italy. An event that might be of interest to people in the communities and that could bring added value so as to recognize the efforts of all those who passionately devote themselves to this activity.

Presidente esecutivo
